Giving you the feet you wish you had

Dermal Integration Technology™

Foot Care Mousse with Dermal Integration Technology™

How Footlogix works:

- A two-dimensional delivery system that mimics the skin's own composition.
- Delivers the active ingredients into the outer layers of the skin.
- With no greasy outer layer, the skin retains its ability to transpire normally.
- The technology is then naturally exfoliated as the skin surface renews itself.
- Increases elasticity, therefore allowing the skin to become perfectly healthy, to be able to perform its true function of PROTECTION.

Footlogix Products

vs.

Oily and greasy creams and salves

Non-occlusive, doesn't seal the skin

Does not impede natural functions of the skin

Non-greasy

No perfumes

Socks and stockings **can be worn immediately** after application

Healing rate elevated - due to better user compliance

Does not wash off in water, soak into clothing or otherwise

Easy to apply

Rapidly absorbed

Hygienic applicator (sealed system)

Occlusive, seals the skin

Impedes the natural function of the skin and prevents transpiration

Greasy residue following application

May **contain perfume**

Socks and compression stockings get soiled or **cannot be worn at all**

Healing rate is reduced due to poor user compliance

May wash off with water, adhere to clothing and weaken the strength

Difficult to apply & not recommended interdigitally

Does not absorb (only sits on the surface)

Non-Hygienic applicator

If you want fluff and buff there is lots to choose from.
If you want great results like *these* discover...

Available in:
2.5 fl. oz./75 ml.

10

Shoe Deodorant

Refreshing shoe spray - kills the bacteria that causes odor in your shoes and provides a fresh fragrance.

Available in:
2.5 fl. oz./ 75 ml.

Professional

13

Foot Soak

Anti-fungal and callus softening. Cleans the skin softly and gently. Helps prevent cross contamination. Has a pleasant peach aroma. Does not dehydrate the skin while soaking.

Available in:
5 oz./150 ml.
33.8 fl. oz./1000 ml.

18

Callus Off

Spray on callus softener for Professional-Use-Only. Two products in one as it works well on the cuticles and calluses. Non-aggressive formula does not need to be wiped or washed off.

Available in:
6.1 fl. oz./180 ml.

3

Very Dry Skin Formula

Contains 10% Urea. For Very Dry Skin. Urea provides protection, care and moisture. Locks in moisture and improves the skin's structure.

Available in:
10.2 oz./300 ml.

Do you have a foot condition you need to treat?

Footlogix has developed a new product line of Foot Care *Mousse* to offer solutions for a multitude of conditions.

A growing number of dermatologists, foot care and diabetes specialists realize that dry skin requires moisture as an effective treatment; not oils. The innovative Footlogix *Mousse* product line was formulated to provide the following benefits:

- Easy to apply
- Absorbed immediately, without residue
- Balanced formulation restores the skin's natural hydration
- Free of perfumes and mineral oils
- Family friendly

The Complete Footlogix Product Line*

For everything that ails the foot

*All products are safe for diabetic use.

Footlogix Foot Soak								
Foot Soak ⑬	9% urea & aloe vera		•	•				•

The Footlogix Pedicure

1. Client Consultation.
2. Remove nail polish. Spray **Footlogix Foot Deodorant Spray 9** onto the foot to deodorize the feet and eliminate bacteria.
3. In a warm water footbath, soak the feet for up to 10 minutes using 1 teaspoon, or one pump of **Footlogix Foot Soak 13**. For DIABETICS – soak feet for only 5 minutes.
4. While client is soaking feet, spray **Shoe Deodorant Spray 10** into the client's shoes to kill all bacteria, so that the client has clean, fresh shoes after the pedicure service.
5. Dry feet completely before continuing.
6. Apply **Footlogix Callus Off 18** – spray around toenails (in place of cuticle remover) and onto calluses. Allow **Footlogix Callus Off 18** to penetrate approximately 2-3 minutes.
7. Cut, file and clean around the toenails while **Footlogix Callus Off 18** is softening and penetrating the calluses.
8. Clean around nails as usual. Apply more **Footlogix Callus Off 18** if necessary (thick toenails, etc).
9. Remove calluses on the sole — apply more **Footlogix Callus Off 18** as needed. (**Footlogix Callus Off 18** works best if allowed to soak into the callus for 2 – 3 minutes). For extra calluses apply second application. Do not re-soak.
10. Repeat with other foot.
11. Once pedicure is completed, massage with **Footlogix Professional Massage Formula 19** for legs and feet.
12. Wipe nails and apply polish.

Note: No need to rinse or wash **Footlogix Callus Off 18** as it benefits the skin.

Simple Steps For Incorporating the Footlogix Professional-Use-Products into The Pedicure

Incorporating Footlogix products into your normal pedicure procedure is very simple. You DO NOT have to change any of your procedures. The use of the **Footlogix Foot Soak 13** will replace whatever you are currently using in the foot soak. The **Footlogix Professional Massage Formula 19** will replace what you currently use to massage the feet and legs. The **Footlogix Callus Off 18** is the only additional product and its use is outlined below. Enjoy your new products and we look forward to hearing from you when you are ready for more!

1. Use 1 teaspoon of **Footlogix Foot Soak 13** per gallon of water and soak feet for your usual allotted time.
2. After all masks and scrubs are completed, spray **Footlogix Callus Off 18** Callus Softener on all calluses and around toenails prior to cleaning around toenails and removing calluses. **Footlogix Callus Off 18** is a great replacement for your cuticle remover. Allow **Footlogix Callus Off 18** to absorb for 2-3 minutes before using the foot file. Re-apply as needed during the callus removal process or to rinse off dust.
3. **Footlogix Callus Off 18** does not need to be rinsed or washed off, as it will benefit the skin.
4. When it is time for foot and leg massage, use **Footlogix Professional Massage Formula 19** for very dry feet.
5. Don't forget to recommend the correct home maintenance product for your client.
6. Educate yourself so you can educate your client. Register for a North American School of Podology (NASP) class today at www.podology.net.

The Footlogix Advantage

Footlogix is an innovative product line designed to provide effective care for a variety of skin conditions affecting the foot - from simple dryness to more severe conditions resulting from Diabetes

Why choose Footlogix Pediceutical line with Dermal Integration Technology™ (DIT)?

Today's educated consumer demands instant gratification – results in as little as 24 hours.

Today's technicians demand a product that is reputable, easy to use, cost effective, but most importantly, a product that works!!

This new product is Footlogix with Dermal Integration Technology™. Where Medi meets Pedi™.

The brilliance behind DIT™ technology:

- It maintains the integrity of the “**active**” ingredient(s) and ensures optimum biological affect to the skin
- It is a patented trans-dermal technology with European roots and North American innovation
- This *Mousse* allows for bacteria-free dispensing which aids in protecting damaged skin against infections
- This *Mousse* forms a safe protective barrier just beneath the skin's surface and with no greasy outer layer, the skin retains its ability to transpire normally.

Why is this important?

This *Mousse* mimics the skin's own composition, enabling it to gently penetrate the outer layers of the skin. By doing so, this product moisturizes with maximum efficiency. The secret to healthy skin of the feet is providing hydration to the layers that need it. Footlogix with DIT™ simply, is *the* product that delivers this hydration system ***instantaneously***.

Today's market place is putting demands on industry leaders to create new technology and products. It is our passion and corporate mission at KvG Group Inc. to ensure that we “change the quality and safety of pedicures in North America, one foot at a time”. **We are the pioneers.** KvG Group also provides a wide range of advanced educational services to promote best practices in advanced foot care.

This product line is sold only through foot care professionals.
